THE "WOW" IN OUR SOLUTION

• =IFS(Z30>=5,"VERY HIGH",Z30>=4"HIGH",Z30>=3"MED","TRUE"," NOW"

MODELLING

Data

Concepto performance analysis table are taken from the website called Kaggle . From the data we had some missing figures to identify the missing

• terms we use conditional techniques to identify the missing terms like exit dentity the missing terms like exit dentity the missing figures

Features

- . Pivoodle ction
- Conditional
- formatting

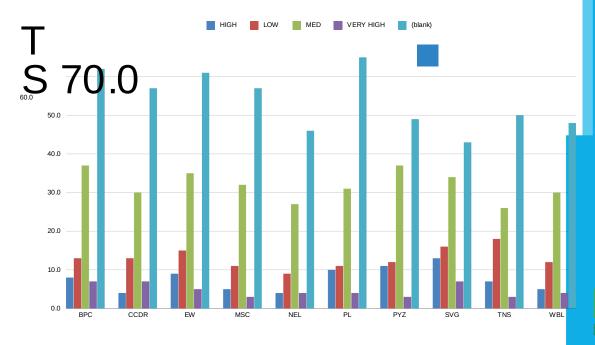

Pivot

1.Click
the insert bar click pivot table in new excel sheet 3.Select business unit and drag it in row
4.Then select performance level and drag it in counselect gender in value

Performance

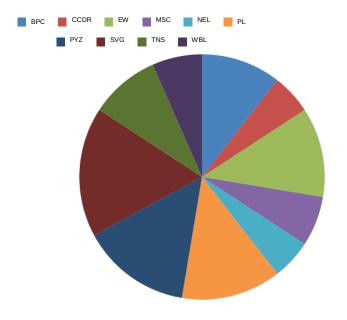

- From the pivot table we can see the analysis for female male and all and we can accomply upper of employees by inerting slicers to see how many are full time and contract based employees. Insert graph for better analysis the graph shows the accurate levels and the performance of employees. We can see
- various graph by changing the options in the graph options.

RESUL

12

Pie chart for high level performance

conclusio

- From the above analysis the low level, medium level to be improved by assigning various tasks and training in their field The current high and very high level employees are improve their intensity by
- rewards and appreciations towards their growth to increase their participation and to give more potential towards their project.
